AQUARIUM & TERRARIUM CAVE AND DECOR COLLECTION

ABOUT US

At Aquireef3D, we create 3D printable decor that transforms aquariums and terrariums into beautiful, natural-looking environments. What started as a passion for aquatic life has grown into a mission to blend aesthetics with real functionality — helping hobbyists and professionals alike elevate their setups.

Each model in this new collection is the result of years of experience in both aquarium keeping and 3D design. These aren't just decorations — they're carefully crafted pieces that solve real tank needs, from creating hiding spots to enhancing layout and presentation. All designs are tested with durable, aquarium-safe materials like PETG.

This catalog introduces our latest caves and decor — available exclusively first-hand to our subscribers. Whether you're upgrading your own setup or want to sell printed models, you'll get early access to standout designs not available anywhere else.

Functional, natural and built to impress — that's the Aquireef3D promise.

WHERE ART MEETS PURPOSE

The Grand Canyon Cave by Aquireef3D brings one of nature's most iconic landscapes into your aquarium or terrarium. Inspired by the dramatic layers and curves of the real Grand Canyon, this model adds both elegance and realism to your setup. Its sculpted form isn't just for show — it also offers a perfect hiding place for fish, shrimp or reptiles, blending beauty with purpose.

At Aquireef3D, every design is made to look natural and feel functional. Whether it's a reptile cave, moss holder or a fish hide, each model is created with attention to detail and real-life use in mind. Our creations don't just decorate a tank — they transform it.

It's nature-inspired design that does more than look good — it works.

NEW COLLECTION 2025

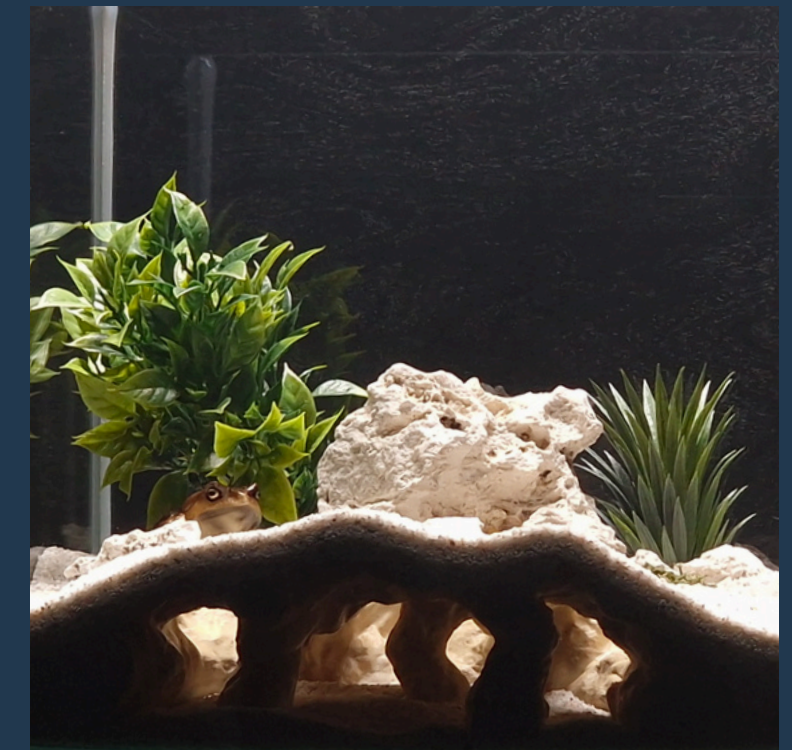

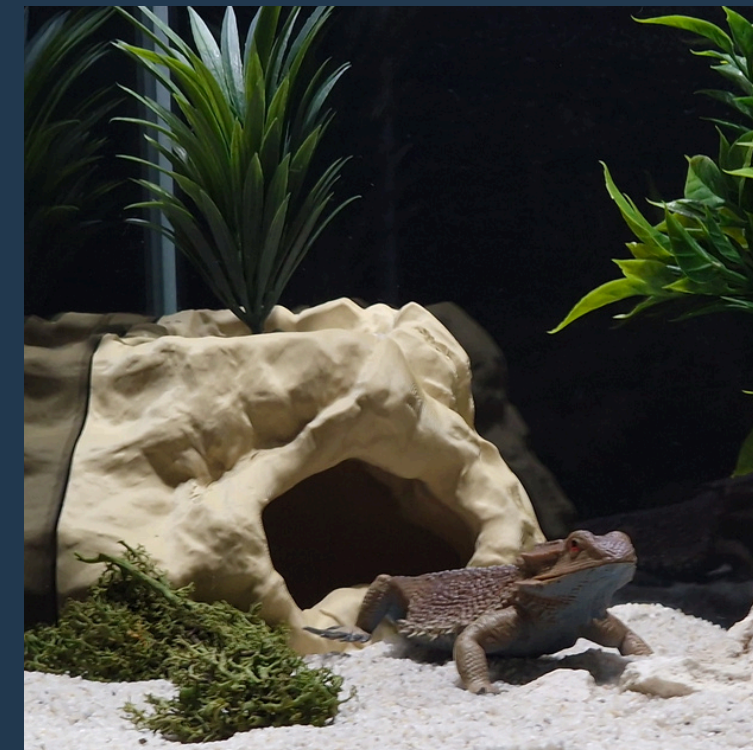

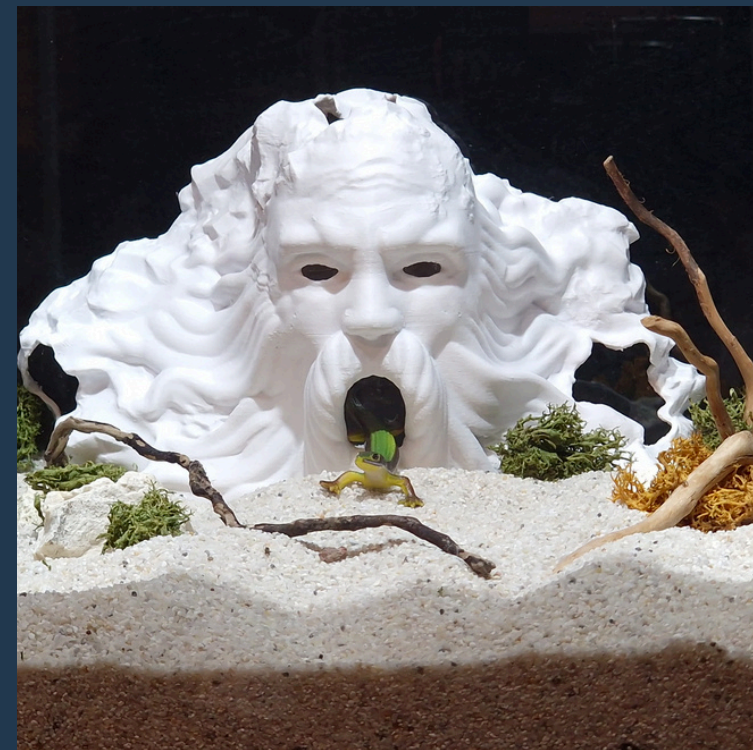

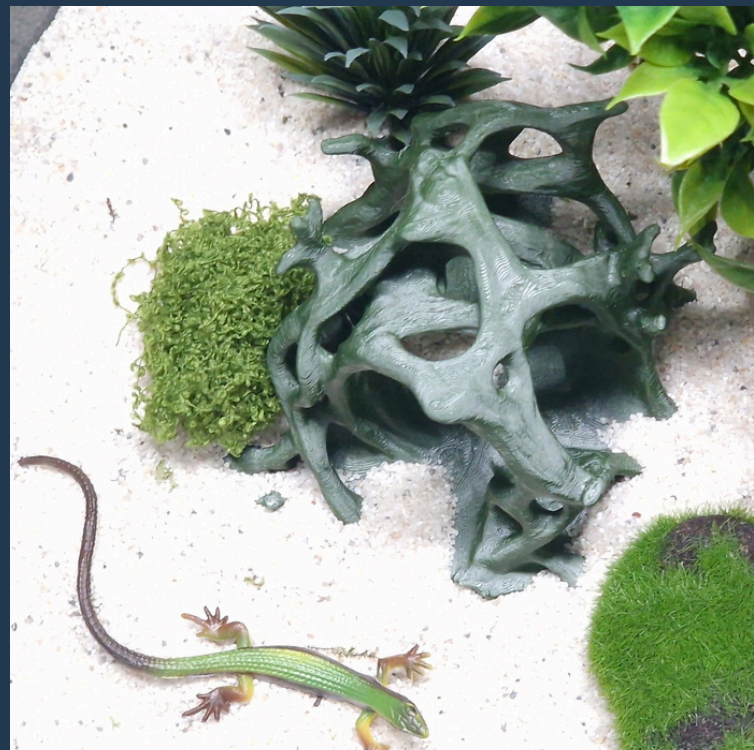

MORE THAN JUST A DESIGN

We've reimaged traditional planters and created something truly multifunctional. These 3D printed cave structures double as natural-looking plant holders — letting you grow greenery right on top while offering your pets a cozy, shaded space to explore and hide beneath.

Perfect for both aquariums and terrariums, this redesign brings a layered, organic feel to your setup. It's not just decor — it's habitat and landscape in one.

NEW COLLECTION 2025

ANCIENT BEAUTY, MODERN HABITAT

Inspired by the grandeur of ancient temples, The Echoes of Rome cave combines timeless beauty with practical design. Its vast inner volume gives pets space to explore and hide, while the wide front opening lets you admire the activity inside. A true centerpiece that turns any setup into a scene of classical splendor.

THE DESIGNER

Linas Vidmantas

With over 15 years in the aquarium hobby, over 140 k hours of 3D print and my personal setup of more than 30 tanks, I'm dedicated to designing unique 3D printed aquarium & terrarium decorations that go beyond aesthetics. I love creating pieces that not only enhance the look of a tank but also serve practical purposes for both fish, reptiles and their owners.

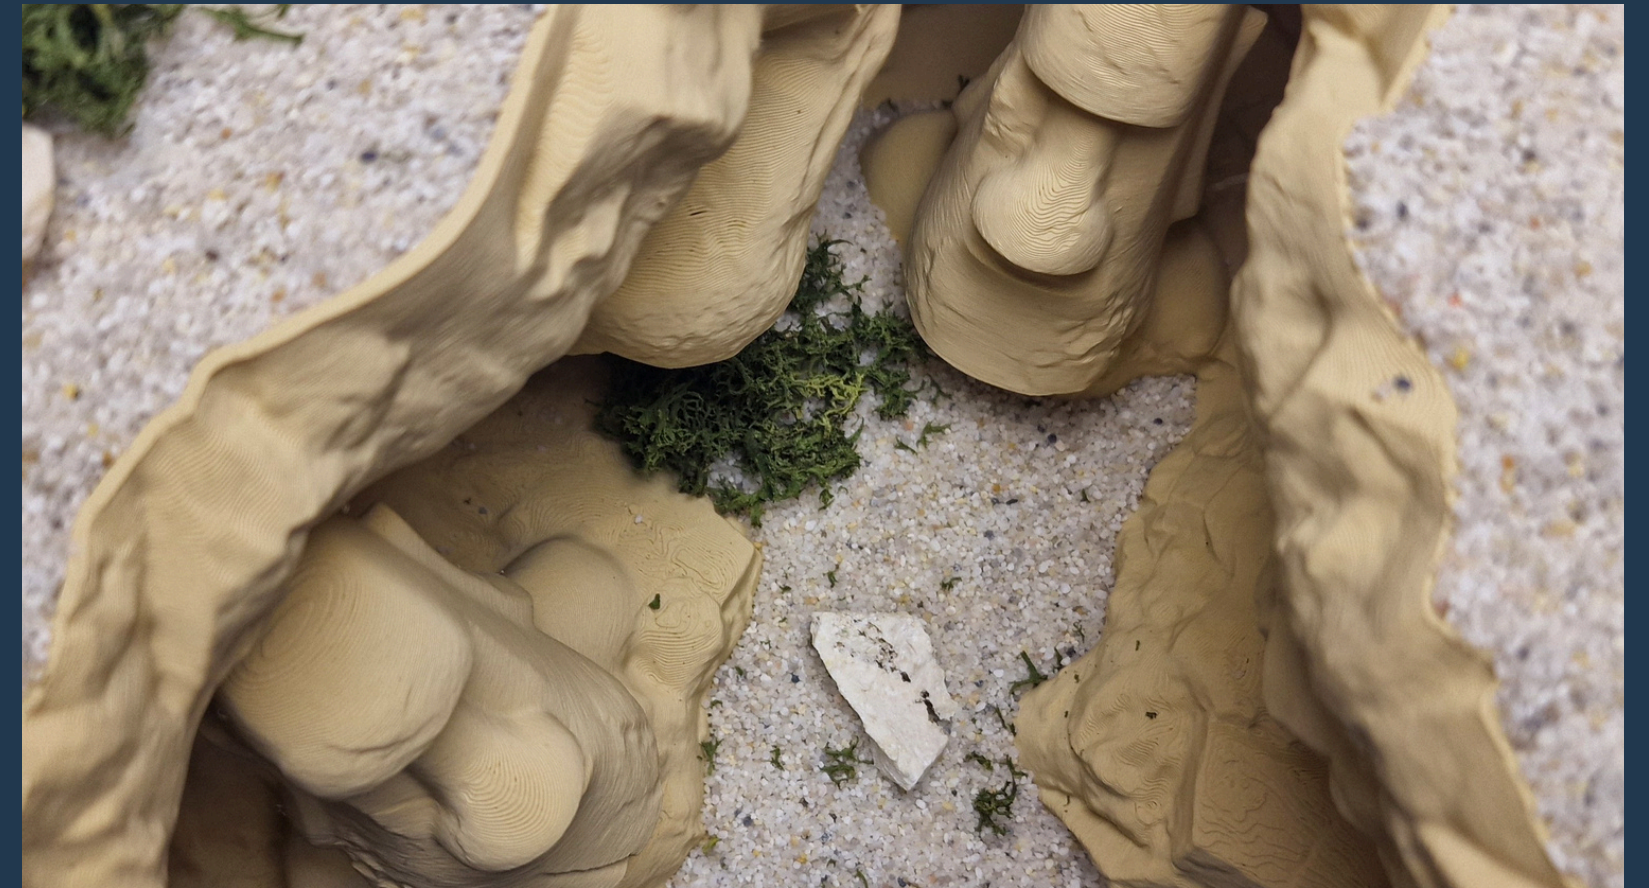

My designs are crafted to solve common challenges in the aquarium world, from offering hiding & exploring spots for aquatic and terrestrial pets, to supporting plant growth, enhancing setup aesthetics and more. Each piece is thoughtfully made to help fellow aquarium or terrarium owners achieve beautiful, functional and well-balanced environments in their setups.

EASTER ISLAND HIDEOUT

The theme of this design is inspired by the Easter Island Moai statues — the iconic monolithic human figures carved by the Rapa Nui people. The two large heads inside a cave resemble the recognizable facial features and proportions of Moai sculptures, making it a playful and artistic reference to one of the world's most mysterious archaeological wonders.
